# + Company Introduction

## Company Introduction

Halo,

Kami Semyeong Biotech Co produsen yang mengkhususkan diri dalam produksi "PANOS", perangkat fototerapi ultraviolet B untuk pengobatan kulit. . Semyeong Biotech Co didirikan untuk mencerahkan dunia dan mempromosikan kesehatan manusia "PANOS", sebuah fototerapi perangkat Ultraviolet B, secara ilmiah dirancang melalui pengolahan khusus dengan mengembangkan substansi memproduksi paling stabil kisaran panjang gelombang (280-320 nm) dari sinar ultraviolet , tanpa membahayakan tubuh manusia. Semyeong Biotech Co menjadi sebuah perusahaan yang mengkhususkan diri dalam pembuatan peralatan medis ultraviolet dengan meneliti dan mengembangkan berbagai macam alat terapi dan peralatan medis yang berkaitan dengan ultraviolet light.Thank Anda.

SEMYEONG Biotech Co.

# + Brief History

## I History

- 2002 Developed a UV-B lamp with a specific wavelength range as medical equipment for treatment of the human body
- 2003 Established N/B Tech Inc.
- 2004 Developed, produced and distributed level 2 medical equipment OMI 1000, 2000 and 3000 (for hospital use)
- 2005 Acquired a patent for a UV-B lamp with a specific wavelength range as medical equipment for treatment of the human body
- 2007 SEMYEONG Biotech Co. became an individual business  
Registered a trademark for an ultraviolet B (UV-B) phototherapy device for skin treatment, PANOS KPA-01 (patent number: 2007-0057124)
- 2008 Developed an ultraviolet B (UV-B) phototherapy skin treatment device for home use  
Acquired safety certification for electrical appliances from the Korea Testing Certification (certification number: HC07120-8001A)  
Developed, produced and distributed an ultraviolet (UV-B) phototherapy skin treatment device, PANOS KPA-01 (for general public use)  
Registered a design for an ultraviolet (UV-B) phototherapy skin treatment device, PANOS KPA-01 (patent number: 2008-0015699)  
Acquired certification from the Korea Institute of Atopy (2008-10-13)
- 2009 Registered the product with the Public Procurement Service (national organization for electronic procurement) (2009-12-24)
- 2010 Acquired European certification for CE 0470 KPA-01 UV-B level 2 light treatment device  
Acquired (NEMKO), (IQNET) ISO 13485: 2003 ISO 9001: 2008 certification Chosen as HIT500 by the Small and Medium Business Corporation  
Received manufacturing license for medical equipment from the KFDA  
KPA-01 granted Received item license for medical equipment from the KFDA  
Received GMP certificate from the KFDA
- 2011 Registered with Saudi Arabia, Sri Lanka, Thailand FDA
- 2012 KPA-02 granted item license for medical equipment from the KFDA
- 2013 Registered with Indonesia FDA
- 2014 Developed HEALING LIGHT HR-UVD (personal use)  
HEALING LIGHT HR-UVD granted item license for medical equipment from the KFDA

## I PANOS?

The ultraviolet B fototerapi perangkat "PANOS" mensterilkan semua jenis bakteri pada kulit dengan penyinaran mereka dengan sinar ultraviolet B (UV-B), yang merupakan sinar yang berhubungan dengan kehidupan dan kesehatan melalui kimia tubuh manusia. Juga, PANOS adalah UV-B perawatan kulit fototerapi perangkat dengan lampu ultraviolet sangat stabil yang menghasilkan berbagai panjang gelombang 280 nm - 320 nm, meningkatkan kekebalan dengan menciptakan vitamin D3 dalam tubuh manusia. Hal ini diakui sebagai teknologi terbaik di dunia.

\* Sinar ultraviolet B tidak dapat menembus kaca atau serat. Bahkan dengan sinar matahari, musim dingin atau daerah yang berada di lebih dari 35 ° di lintang kurangnya cukup sinar ultraviolet B untuk menghasilkan lebih banyak vitamin D3 sebagai kebutuhan tubuh.

## I Manufacturing technology

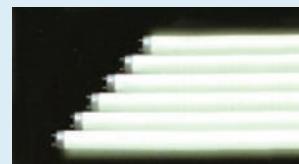

### Measuring ultraviolet light

Glowing materi (boronic strontium asam) adalah campuran selama 24 jam dan kemudian plasticized selama 3 ~ 6 jam pada suhu 500-1000 ° C dalam tanur listrik.

### Measuring negative ions

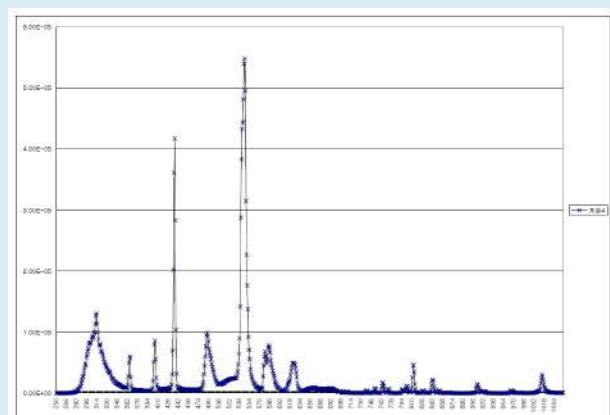

Lampu UV-B memiliki ion negatif berlimpah yang bermanfaat bagi kesehatan.

Detektor ultraviolet dapat mengukur sinar ultraviolet dari lampu UV-B sementara lampu normal tidak bisa.

Menciptakan lampu UV-B dengan tabung kaca khusus yang dapat menyerap ultraviolet juga ringan tapi blok kisaran panjang gelombang di bawah 280 nm yang berbahaya bagi tubuh manusia.

## I KPA-01 PANOS spectrum

Panjang gelombang puncak :311.7nm good untuk Psoriasis, leukoderma pengobatan panjang gelombang 295-300nm : vitamin D make panjang gelombang Kriss (Korea Research Institute of Standar dan Ilmu) NO : 1001-01295-001

# + Production Technology

## I Model

### Panos KPA-01

Ultraviolet light(UV-B) exposure for skin therapy

Country of manufacturer : Korea  
Name of manufacturer : SEMYEONG Biotech  
Wave length : 280mm~320mm  
Intensity of illumination :  $10\mu\text{W}/\text{cm}^2 \times 3$   
Voltage : 220v/70w  
Dimension : H 90cm, L 70cm, W90kg

Domestic accreditation : (KPDA) Ultraviolet light exposure machine-Level 2  
Use : Skin disease treatment  
Accredited in Europe : Class II A, UV-B radiation Level 2 medical equipment  
Use : Effective for skin diseases such as atopic, psoriasis, eczema

### Panos KPA-02

Ultraviolet light(UV-B) exposure

Country of manufacturer : Korea  
Name of manufacturer : SEMYEONG Biotech  
Wave length : 280mm~320mm  
Intensity of illumination :  $10\mu\text{W}/\text{cm}^2 \times 2$   
Voltage : 220v/45w  
Dimension : H 90cm, L 70cm, W90kg

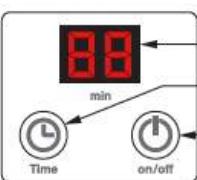

Domestic accreditation : (KPDA) Ultraviolet light exposure machine-Level 2  
Use : Skin disease treatment

### HR-UVD

Healing light

Country of manufacturer : Korea  
Name of manufacturer : SEMYEONG Biotech  
Stand size : 790mm(H) X 1,270(L) X 124mm  
Fold size : 763 X 124 X 113mm  
Box size : 810 X 160 X 140mm, 9kg  
Weight : 8kg

- 1.Press On/Off button.
  - 2.Choice setting time : 1,5,10, 15,20minutes.
  - 3.Press On/Off button once more.
- ※ Feature
- 1.Anybody can assemble simply.
  - 2.Foldup design can keep small space.
  - 3.For personal & for use living aptment pet.

No	Name	Function
①	Display	displaying operation time
②	ON/OFF	power on/off button
③	Setting for operation time	setting time : 1,5,10, 15,20minutes.

## UV-B Related Research Institutions

*Testing institutions* Kyungpook National University, Catholic University of Korea (orthopedics)

- Belajar pada pembentukan tulang dari equipmentEffectiveness medis ultraviolet sebagai
- peralatan medis osteoporosis melalui Analisis serum dan radiasi pengujian
- aktif vitamin D, 25 (OH) vitamin D setelah radiasi UV-B menunjukkan bahwa vitamin D dalam kelompok eksperimen telah meningkat secara signifikan dibandingkan dengan kelompok kontrol.

*Testing institutions* Physical Therapy Department, Daegu University

- Studi pada fitur bintik-bintik merah dan fitur keselamatan dari irradiator UV-B
- Generasi dan keselamatan gelombang elektromagnetik melewati persyaratan teknis untuk inferensi elektromagnetik (pemberitahuan tidak ada 2000-79 Kementerian Informasi dan Komunikasi.) Dan keselamatan fitur listrik dan mekanik telah disetujui oleh KFDA
- sebuah makalah penelitian yang diterbitkan dalam Journal of Korea Fisika Society di 2006

*Testing institutions* Women's Medical Center at KyungHee University Oriental Medicine Hospital in Gangnam

- Studi tentang efek Ultraviolet-B (UVB) radiasi pada kalsium, vitamin D3 dan kadar kolesterol pada wanita menopause.
- Hasil penelitian menunjukkan bahwa kadar kalsium darah di kedua kelompok UV-B dan kelompok kontrol meningkat secara signifikan setelah penyinaran UVB.
- vitamin darah di kedua kelompok UV-B dan kelompok kontrol meningkat secara signifikan setelah penyinaran UVB.
- Total kadar kolesterol darah di kedua kelompok UV-B dan kelompok kontrol menurun secara signifikan setelah penyinaran UVB.

## + How to Use?

### | for make VitaminD & VitaminD related disease

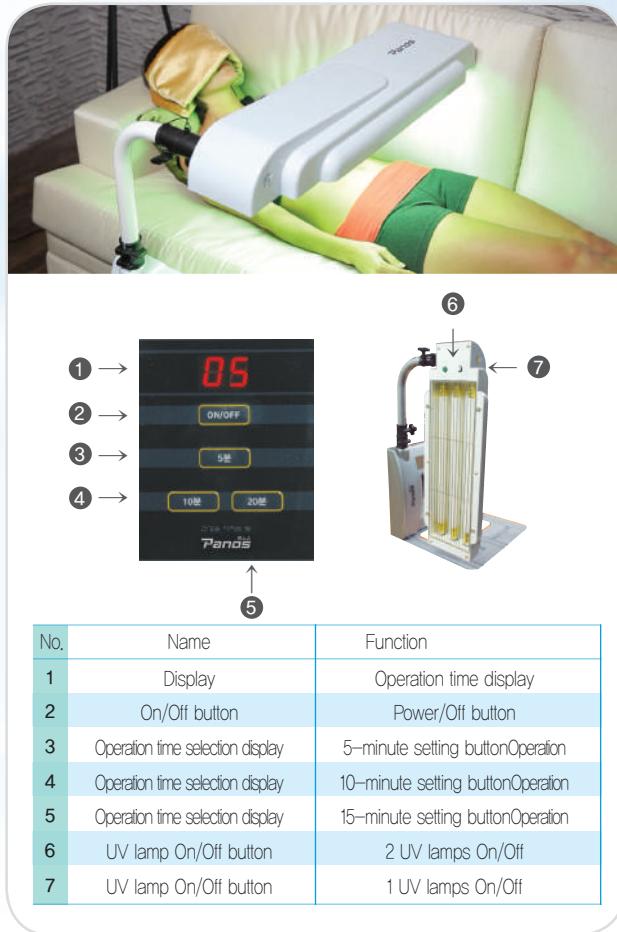

- \* Hal ini merekomendasikan untuk mengekspos punggung atau perut.
- \* Kasus oleh rhinitis, mengekspos perut atau kembali ke lampu hidung.
- Jika gejala parah (kanker dll), Anda dapat mengekspos bagian yang sakit sebagai bubur yang Anda bisa ( selama 1-2 jam sebagai salah satu waktu dan secara bergantian: perut, punggung, kaki, lengan, sisi dll ..)
- Terlepas dari lampu sekitar 50-70cm
- 2-3 kali seminggu 20miniture / waktu (orang Nomal)
- Anda dapat melihat efek dari berbagai penyakit seperti Rhinitis, kanker, nodul tiroid, diabetes, inkontinensia, osteoporosis, penyakit prostat, pruritus ginjal,

Detoxification

### | Skin disease treatment

- Pada awalnya, menyesuaikan pengaturan sebagai 5 menit untuk berusia di bawah 13 tahun, 10 menit untuk berusia di bawah 20 tahun, dan 20 menit lebih dari 20 tahun. Jika tidak ada masalah, Anda dapat menambahkan jumlah lampu
- directry mengambil th cahaya untuk bagian yang sakit.
- Psoriasis dan atopi harus lebih dekat sebanyak yang Anda bisa.
- memencet jerawat & mencoba Panos dapat baik efek
- kasus oleh Atopi (kekebalan kulit), Terapkan terkena bagian &
- kasus perut dengan Vitiligo, bagian tangan adalah efek cepat, wajah adalah efek lambat.
- kasus oleh tret wajah, silakan memakai kacamata atau meletakkan handuk
- Jika Eritema membuat kulit Anda cerdas, Anda dapat beristirahat selama beberapa hari. Namun, jika Anda dapat menanggungnya, dianjurkan untuk melanjatkannya.

## ■ Instruction for Use

- Use 2~3 times a week
- Keep a certain distance during the irradiation (about 50~70cm from the lamp)
- Irradiate the affected skin directly.
- Irradiate the abdomen & back after taking off the clothes to create Vitamin D3.
- It is recommended to irradiate the affected part for 5 minutes for children under 10, 10 minutes for people under 20 and 20 minutes for adults for first-time user (using 1 bulb light).
- Gradually increase the lux to 1-bulb light lux, 2-bulb light lux and 3-bulb light lux.

## ■ Product specification

- Country of manufacture: The Republic of Korea
- Manufacturer: SEMYEONG Biotech Co.
- Use: Ultraviolet (UV-B) phototherapy device for skin treatment
- Wavelength range: 280nm~320nm
- Intensity of illumination:  $10\text{mW}/\text{cm}^2 \times 3$
- Voltage: 80-250v / 70w
- Dimensions: 90cm (H) 70cm (L) 9kg (W)
