

# PNEUMATIC TRANSPORT SYSTEMS

PTS-Sitratec Software

2019

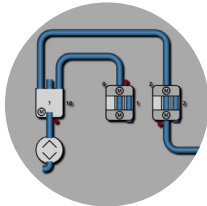

Sitrateg introduces a new system of pneumatic tube system specific for the hospitals environments, the team of engineers of Sitrateg has developed a newer version of a more practical, silent and safer equipment:

- Silent during sending and reception of a carrier.
- Possibility to insert the carrier in sending mode even if the station is reserved for an incoming shipment.
- Super strong structure in metal with internal components with virtually no maintenance required.
- Extra compact area of installation.
- Possibility of installation to sight or inserted in wall.
- Possibility of connection to the main pipeline from the top (Endstation) or from the bottom/passing (Passing-Through Station).
- Operative panel touch-screen 8" colors Full HD.

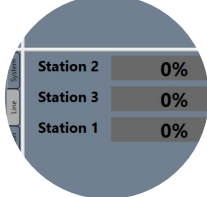

## Features

2

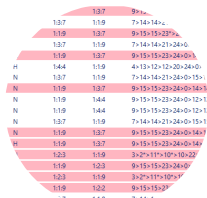

### System View

Visualization of the system in real time in graphical aspect, graphical animation of each carrier during transportation, clickable elements/devices to see diagnostics, maintenance, status and more.

### Traffic View

Studied algorithms calculate and predict traffic moments to optimize carriers movement between the lines, always showing a load index for each line.

### Events Log View

A detailed log report of each shipment can be consulted every time you need for just find a specified carrier or find a possible malfunction. With historical archive and export tables options.

ID	Name	Status
40	System Admin	<input checked="" type="checkbox"/>
445	Tecnico	<input checked="" type="checkbox"/>
55	Utente Demo	<input checked="" type="checkbox"/>
101	Utente 1	<input checked="" type="checkbox"/>
102	Utente 2	<input checked="" type="checkbox"/>
103	Utente 3	<input checked="" type="checkbox"/>
104	Utente 4	<input checked="" type="checkbox"/>
105	Utente 5	<input checked="" type="checkbox"/>
106	Utente 6	<input checked="" type="checkbox"/>
107	Utente 7	<input checked="" type="checkbox"/>
108	Utente 8	<input checked="" type="checkbox"/>
109	Utente 9	<input checked="" type="checkbox"/>
110	Utente 10	<input checked="" type="checkbox"/>

### Users Settings

The users listing have no limit in the system, and custom rules/group can be made and modified whatever you want.

- Check access system with Rfid/Magnetic Card or numerical Password.
- Identification and traceable with Barcode of the inserted material.
- Portholes of shipment and arrival electronically checked.
- Consultation file of the effected operations.
- Personalization fast rubric.
- Check usage of the carrier for signaling necessity of maintenance.
- Automatic restitution of the empty carrier to the owner in the system.
- Diagnostic and tests of the station (Service functions).

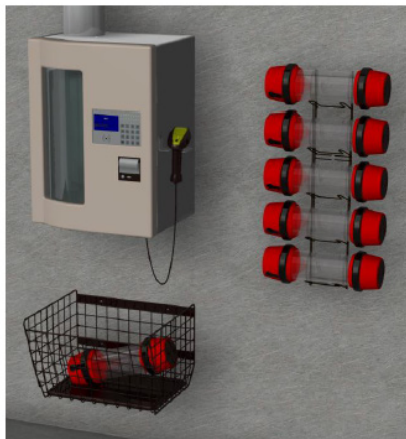

And optional:

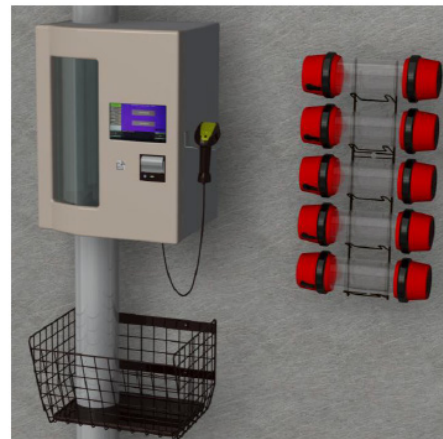

- Remote info panel for anticipate information about the carrier to the Laboratory arrivals.
  - Printing paper receipts for completed shipments or correct receipt of the material.
  - System of washing and automatic disinfection of the carriers.
